

Exhibit A

It is respectfully requested that the experimental license, which expired on November 1, 1998, be reinstated. The applicant wishes to continue using the license at the same location and same general technical parameters previously authorized (exception: emissions designator should be changed to 300KGXW). In the interest of reducing processing efforts involved in authorizing a new license, it is therefore requested that the recently expired license be reissued to the applicant.

In the alternative, the applicant requests that the agency process this application as a request for an initial license. The FCC's fee type code and application processing fee are identical (EAE / \$45.00).
