

FCC Authorization Application

Form 442 File Number: 0138-EX-PL-2009

Date of Submission: April 7, 2009

The Alaska Aerospace Development Corporation (AADC) is an Alaskan State owned agency which operates the Kodiak Launch Complex (KLC) on the island of Kodiak. The KLC is a rocket launch facility designed to launch payloads into polar orbits and smaller rockets into sub-orbital flight.

Many of these rockets use GPS tracking and navigation systems which must be tested before flight.

AADC is requesting permission to install and operate GPS relays within three of its facilities at the KLC. These GPS relays will allow AADC's customers to conduct pre-flight tests of their rockets' GPS tracking and navigation systems.
