

NARRATIVE STATEMENT

This experimental will be use to demonstrate Alcatel-Lucent's state of the art Rapid Deployable Network(RDN).

The RDN is a wireless network that can be deployed anywhere, anytime for emergency responses, disaster recovery, public safety and homeland defense.

Demonstrations will be made to public safety entities, as well as to the military services for deployment.

We are requesting this nation-wide license in order to demonstrate this technology at various state and local area offices.
