

Request for Expedited Processing
STA File No. 0514-EX-ST-2013

Alcatel-Lucent ("ALU") hereby requests expedited processing of its STA Filing No. 0514-EX-ST-2013 based on a need to demonstrate the feasibility of LTE within the licensed BRS/EBS spectrum bands prior to the completion of its commercial development of its 3GPP LTE Band 41 radios and based on a short window of spectrum access availability in the BRS/EBS bands from the licensees listed in Table 1.

Alcatel-Lucent wishes to commence experimental operations on June 10, 2013 and will cease by midnight September 30, 2013.

An expedited grant of this experimental authorization is in the public interest as it will allow Alcatel-Lucent, who will be conducting the trial, to demonstrate to rural wireless providers the benefits of LTE technology in the BRS/EBS bands. This technology, if deployed in rural parts of Virginia, will provide high-speed data to rural underserved and unserved areas.

Table 1:

Call Sign	Radio Service	License Name	Market Code	Market/GSA Center	Channel Block
