Subject: FCC File# 0448-EX-ST-2007

Message:

The emission designator is 24G0X0X
stands for 2.4 GHz, analog signal - there's no signal, therefore no modulation. So I left that code to be X
so it's not misinterpreted.

The dish used has 3.12 m diameter made of steel mesh. It is an old C-band parabolic dish.

Thank you,
Allen
