

## Attachment 7 Altaeros ZD Antenna Structure for 6402 Radio System:

Altaeros aerostat will combine four (4) ZDA model ZDAFP0727-07XP antennas into an array of orthogonally arranged sectors. Each antenna is cosmetically altered to remove all extraneous weather proofing, mounting hardware, and other non-emitter hardware to reduce weight. The emitters themselves are unaltered and mounted as specified below in the diagram.
