

SUBJECT: Modification in Experimental License (Call Sign: WG2XHO)

Dear Sir/Madam,

This application is filed to request the license for higher BTS Power & ERP. The current license of 10W ERP is not providing the sufficient coverage footprint for the field testing of our eNB solution.

This application has been filed to update the followings:

1. The BTS Output Power = 40W , $ERP = 46\text{dBm}(40\text{W}) + 15.86\text{dBd}(\text{antenna Gain}) = 61.86\text{dBm} = 1.5\text{KW}$

A license fee of \$ 60 has been paid

Request you to process this application.

Thanking you in advance.
