Federal Communications Commission  
Experimental Radio Service  
1919 M Street N.W. Room 7326  
Washington, D. C. 20554

Dear Mr. Wright,

Re: Experimental License Request

This is a request for a experimental license pursuant to Section 5.202(h) of the Commission's rules. AT&T requests authority to perform developmental testing of wireless in-building voice and data communications equipment operating in the 864-868 MHz range. The purpose of these tests is to gather engineering data relating to signal propagation in and out of buildings, interference, hand-off functionality, durability, etc. These experiments will be performed at various AT&T Bell Laboratories and manufacturing sites with newly developed or purchased equipment. The following items are attached:

1. FCC Form 442
2. Check for \$35.00 to cover filing fee
3. Exhibit 1

Your prompt attention to this request will be appreciated.
