

Amplisine will be operating a composite antenna, made up of two of the Ettus Research Directional Antennas noted in the form. All antennas will be pointed exactly horizontal (*i.e.* 0 degrees from horizontal). At the 33°30'27.72"N/101°50'44.04"W location, the orientation in horizontal plane (degrees from True North) will be 124 degrees for one antenna and 274 degrees for the other. The response to item (b), orientation in horizontal plane, is the average of these.
