Re: Form 442 Line 7 Narrative
File No.: 0042-EX-PL-2002

Aperto is a manufacturer of MMDS transceiver equipment. In order to properly assess the operation of their products, radios must be placed in a network configuration under actual installation and operation conditions. Aperto has obtained permission to operate their radios from Sprint, the MMDS license holder.

By operating their radio products under these conditions, Aperto will be able to judge the efficacy of their products and the accuracy of simulation algorithms with respect to range, path loss, data throughput, and under multipath conditions.

Sincerely,

THOMAS N. COKENIAS
Agent for Aperto Networks
