Tom Cokenias
TN Consulting

Dear Mr. Cokenias:

We are currently in the process of reapplying for our FCC experimental license in the 2.5-2.686 GHz MMDS frequency band.

At this time, we have had verbal discussions with Sprint, the lessee of a number of channels in the area covered by our experimental license. They have agreed to provide us with a single 6 MHz channel for experimental testing after they receive a copy of renewal grant for the experimental license.

Sincerely,

Dean S.K. Chang
Director, Product Management
