Subject: Addittional Information for 0299-EX-PL-2015

Hello Jan

I will need a few more items to complete the information for your application and initiate the coordination with our International Bureau and NTIA.

1. NTIA requires some technical data fields for their coordination. A form letter is attached that list these data items. Please submit these for each frequency.
2. Please submit an ITU spacecap filing. This database file cannot be submitted to ELS so we have a work around. Please change the file extension to “.txt” and send directly to me. All other exhibits should be uploaded to your application file to make sure the application package is stored in the licensing system.
3. Please submit ITU cost recovery letters for the ITU filings. Examples and a public notice are attached.
4. Please submit a copy of your NOAA license for the camera operation.

Regards
Tony S
