Hello Jan

You will need to send me the Spacecap database file. You will need to create the .mdb file and then change the extension to .txt and email it directly to me. As you noted the ELS system only accepts pdf files.

Please also send me the NTIA data that is specified in the attached document.

Thanks
Tony

Hi Tony,

For the subject Part 5, Form 442 we have now added the ODAR and the SpaceCapV7 files. Also there are two antenna patterns that go with the SpaceCap File as "sub-attachments."

BTW, the only allowed format that we seem to be able to send the SpaceCap, via the website, involves first converting it from a Microsoft Access file to a text file (.txt) and, since that is not allowed via the website, we have converted the .txt to an Adobe .PDF file. If this is the wrong format, please let me know how we should send it to you and in what format.

This Form 442 is now ready for review.

Thanks,

Jan A. King
