Subject: Re: Request for Info - File # 0196-EX-PL-2016

Mr. Serafini,

Thank you for all the information on contacting the FAA. As of now, we are no longer going to need a license for the 1350-1395Mhz and the 2200-2500Mhz.

All we need now is the 902.00-928.00Mhz and the 4.4-5.0Ghz station.

Thanks in advance,

Shanon Kern

Those bands are being coordinated with NTIA as well. I won't be able to grant them until they clear and it won't buy much time to try and split them off. It would be best for you to concentrate your efforts on the FAA coordination. The aftrcc usually can turn around in a reasonable time.

Mr. Serafini,

Thanks for the information. Is there a way to amend or change our application? It looks like the 1350-1295MHz and 2200-2500MHz is going to require some time and coordination to complete with the other agencies. If possible we would like to focus on the authorization for the 4.4-5.0 Ghz and 902.00-928.00MHz station.

Thanks,
Shanon Kern

Hi Shanon

Arctus is asking for 2200-2500 MHz. Afttrcc should be doing the 2360-2390 MHz portion that is included in your request. Did you mention the range when you talked to them or only the 2200 MHz and they though your were asking for a spot frequency?

FAA offices for coordination - Try this page for FAA contact to do the NGT coordination. It is a "Non-Government Temporary" coordination reference number.

Mr. Serafini,
Please see below.

I just got off the phone with the people at the AFTRCC. They told me that they do not coordinate at the 2200 Mhz Band as required per NTIA to complete our application.

Please Advise,
Shanon Kern
