For the attention of Tony Serafini
Re: File No. 0004-EX-PL-2000

Dear Mr Serafini

Following our conversation today, please find attached revised pages of this application. Their content is as before, but I have separated the information so that it will be more manageable to treat certain information as confidential, as we requested in our letter of November 22nd 1999.

Confidential Exhibit 1 now contains all the specific technical information which we would wish to remain confidential. Confidential Exhibit 2 describes the program of research we wish to carry out.

We acknowledge that the frequency and EIRP information contained in our original Application can be made public.

I hope this provides a convenient way to manage these documents: please let me know at (617) 498 6219 if you need any other changes.

Yours sincerely

G K A Oswald
Associate Director
