Re: AST&Science Experimental License Application

Dear Mr. Avellan,

AT&T Mobility LLC, on behalf of its affiliate Lubbock SMSA Limited Partnership (collectively "AT&T") has reviewed AST&Science LLC's ("AST&S") application to renew its experimental call sign WJ2XZZ. By this letter, AT&T indicates its continued consent to the activity conducted under this experimental authorization, subject to the conditions and limitations below.

First, AT&T's consent is conditioned on AST&S's adherence to the technical parameters and outlined in its license for WJ2XZZ.

Second, AT&T's consent is conditioned on AST&S's confining its testing to the frequencies listed on its license, and on AST&S's intermittent use of this spectrum for testing purposes only.

Third, AT&T's consent is conditioned on AST&S's adherence to the terms of its license and any conditions specified by the FCC. AT&T's consent is void upon the expiration or revocation of AST&S's experimental license.

Fourth, AT&T's consent is subject to the condition that AST&S physically fence its ground antenna to prevent interference, and immediately cease transmissions in the event of interference to AT&T's network. To facilitate compliance with this condition, AT&T and AST&S have supplied the following 24/7 points of contact that will give and receive notice of interference.

AT&T's consent is subject to the conditions and limitations set forth in this letter, as well as AST&S's acknowledgment of same.

Please contact the undersigned with any questions.

Sincerely,

/s/ David Wolter
