Subject: Additional Information Request

Message:

In addition to my previous questionnaire:

Your exhibit states, "To facilitate the experiments, Astro Digital seeks authority to communicate with the Tromsø Station, using currently authorized frequencies, 400.5 MHz (space-to-Earth) and 402.9 MHz (Earth-to-space)."

Please note that FCC doesn't grant license for the transmit portion of the foreign ground station. In this modification request you can only add the Cubesat to the earth part.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of April 28, 2020 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
