Subject: Request for Info - File # 0031-EX-CM-2026

Message:

Good afternoon Nimesh,

The team has decided not to increase the maximum power from 0.3 W ERP to 0.5 W ERP. As a result, there should be no need to provide the Power Flux Density to the Air Force, since we will no longer be pursuing the request to increase the ERP for 8125 MHz. All other modification requests remain unchanged.

Please let me know whether we need to amend the application or if the FCC can make this change offline.

Thanks,
Angie
