Flag Status: Flagged

Dear aa6361@att.com,

The FAA Spectrum Engineering Services has completed the review of your Frequency Coordination Request.

TRK 210954 is assigned an FAA Coordination number NG T210974 that indicates FAA's coordination that may or may not include operational limits/conditions as part of the requirement for FAA concurrence. The FAA Spectrum Engineering Services has provided the following comments:

COMMENTS: NOTCHING OUT 2690-2750 MHZ TO PROTECT FAA OPERATIONS IN AUSTIN, TX

Please note that this concurrence does not constitute authority to transmit. Your authority to transmit must be obtained from the FCC.

Please provide this concurrence notice to the FCC as part of your frequency application, to demonstrate completion of the FAA coordination process. The FAA Coordination number is only valid until 5/15/2022; if you need an extension, please submit an inquiry via WebFCR .

The attached file contains a Card 3 format with all technical and operational parameters; operations are required to be contained within these parameters for the FAA's concurrence to remain valid. If any of these parameters change, the license to transmit shall be re-coordinated with the FAA and updated with the FCC. A document that explains each field of the Card 3 format in plain text is attached.

The following Revision Table outlines key parameters of this coordination:

Attribute	Record Parameter
Serial Number	NG T210974
Frequency	M2425.0000
Upper Frequency	M2690.0000
City	AUSTIN
State	TX
Transmitter Latitude	302328.00N
Transmitter Longitude	0974505.00W
Receiver Latitude	302328.00N
Receiver Longitude	0000000.00W

Best regards,
