Message:

Dear Mr. Serafini,

Thank you for the prompt response to Athena Wireless Communications, Inc.'s Experimental License application (File Number: 0494-EX-PL-2013). We are requesting a license *primarily* at our research and development facilities in Surprise, Arizona. Since the application form requested coordinates for a specific location, we used such facility's coordinates. However, we also seek approval to *occasionally* operate and demonstrate at other potential customer or partner locations around the Nation, for which the exact locations and timeframes are simply not known at this time. Thus, Athena seeks authority to conduct its experimental operations nationwide.

I hope this clarifies and confirms our request.

Kind regards,

Terry McManus
COO
Athena Wireless Communications
