

Question 14:

Has applicant or any party to this application had any FCC station license or permit revoked or any application for permit, license or renewal denied by this Commission? If "YES", **include as an exhibit a statement giving call sign of license or permit revoked and relate circumstances.**

Call Sign/Permit:

WF2XYI

Reason:

The Call Sign/Permit above was previously submitted by Aurora Flight Sciences for an unrelated communications facility, and was denied/dismissed-without prejudice due to incomplete information regarding the modification of a license, and also because additional coordination with the FAA was requested.
