Application Narrative for Proposed Equipment

Proposed Program

AutoNation Porsche seeks authorization to operate a GPS repeater system within a fully enclosed Porsche automotive workshops located at 11910 NE 8th St and 2221 120th Ave NE. The purpose of this system is to provide GPS signal coverage inside the service bay for the calibration, diagnostics, and testing of Porsche vehicles equipped with GPS-based navigation, telematics, and driver-assistance systems.

The repeater system will allow technicians to simulate real-world GPS conditions in a controlled, shielded environment without exposing external systems to interference. We are committed to operating this system in full compliance with FCC regulations and ensuring that it does not cause harmful interference to GPS users outside the intended coverage area.
