Subject: FCC File# 0257-EX-RR-2013

---

Message:

File No. 0257-EX-RR-2013

Ref. No. 22026

Ms. Nguyen:

In further reply to your request for FAA coordination dated 11/15/13 (Ref. No. 22026), this is to advise you of the following:

BAE Systems is still waiting for FAA to complete coordination of the following frequencies: 109.325 MHz, 109.375 MHz, 111.575 MHz, 113.825 MHz, 114.95 MHz, 116.1 MHz, 117.275 MHz (you previously confirmed that coordination was not necessary for the 940.4-1200 MHz band, because the license for Station WF2XUB does not contain any frequencies within this band. On 12/11/13, BAE Systems requested additional time to allow FAA to complete coordination of these frequencies. On 1/7/2014, BAE Systems requested additional time to allow FAA to complete this coordination.

• Today, the FAA processor's email stated that additional time would be necessary to complete the coordination, as set forth below:

From: Anuj.K.Sinha@faa.gov [mailto:Anuj.K.Sinha@faa.gov]

Subject: RE: Status Check re: BAE Systems - Requests for FAA Coordination

I will be working on your request next week for the additional 7 frequencies.

Anuj Sinha

Frequency Management Officer, Spectrum Engineer

Federal Aviation Administration (FAA)

ESA Spectrum Engineering Services, AJW-1C5

Office: 718 977 6609

• Accordingly, it will be necessary to obtain additional time to complete FAA coordination. To that end, BAE Systems requests that it be provided until February 28, 2014 to allow FAA to complete this coordination. If additional time is required beyond that date, the applicant will contact you. As soon as coordination is completed, BAE Systems will advise you.

Please advise if you have any questions regarding this matter.

Respectfully submitted,

Jeff Rummel

Attorney for BAE Systems
