Subject: BAE Systems Response to Request For PRR under File No. 0257-EX-RR-2013

Mr. Asongwed,

I have reviewed your request for the PRR for the application under File No. 0257-EX-RR-2013.

There is no set Pulse Repetition Rate (# of pulses defined for a set time period). During typical testing, the Pulse Repetition Rate for any single frequency will be at most 1 pulse per second as the source sweeps through a frequency list, however, we have instances when the transmit is set on a single frequency for data collection, and there is no pulsing.

Please let me know if need additional information pertaining to this request.

Best Regards,
- George
