

Exhibit 1

There is pending at this time a modification application for Station WD2XSG under File No. 0136-EX-CM-2020.

Pursuant to Commission staff direction the licensee has postponed filing this renewal application during the pendency of the modification application to allow time for the modification to be granted and to avoid having both applications pending at the same time.

However, because the modification application has not yet been granted, this renewal application had to be filed prior to the September 1, 2020 expiration date to retain operating authority. Licensee requests waiver of the renewal filing timeframe specified in Section 5.59(a)(2) and licensee understands that the Experimental Licensing Branch will waive the timeframe under these circumstances.

The licensee requests that upon grant of renewal, the Commission include the modifications requested in File No. 0136-EX-CM-2020.
