

Exhibit 1

This application requests modification of the WG2XZT license to:

- **Modify** the following existing ranges as described below:
 - o Change 620-**756** MHz to 620-**755** MHz
 - o Change 776-**788** MHz to 776-**787** MHz
 - o Change **1855**-1950 MHz to **1900**-1950 MHz
 - o Change **5250-6000 MHz** to the following **4 discrete frequencies**:
 - 5250** MHz
 - 5500** MHz
 - 5920** MHz
 - 5940** MHz
- **Delete** the following from the license:
 - 1040.35 MHz
 - 1195.095 MHz
 - 1356 MHz
 - 1950-2050 MHz

As a result of these modifications, BAE Systems believes that the following Special Conditions can now be deleted from the license, as the specified frequencies/ranges will no longer be included on the license – **BAE Systems requests removal of the following Special Conditions:**

- SC 10: All frequencies within the specified bands have been eliminated.
- SC 11: The identified frequencies have been eliminated.
- SC 13: Frequencies listed in this condition are not currently listed on the license.
- SC 14: The frequency listed in this condition is not currently listed on the license.
- SC 18: The identified frequency has been eliminated.

Finally, this is to confirm that the license will continue to support both contract and IR&D activity. The USAF contact numbers (FA8620-11-G-4029; FA8628-16-G-3028) remain the same. However, the POC is updated to reflect:
