

Exhibit 1

In connection with this renewal application, it is noted that there is also pending at this time a Modification Application for call sign WD2XSG under File No. 0113-EX-ML-2014, which seeks Commission authority to delete the 2.655-2.69 GHz band from both locations on the license.

Accordingly, it is respectfully requested that upon grant of this renewal application the same changes be made to the WD2XSG.
