Subject: RE: BAE Systems - FAA Coordination Request - 118-137 MHz - Pending Renewal - File No. 0311-EX-RR-2017 (Merr Field Test)

Jeff,
The FAA concurs with the renewal of the subject license for the five (5) frequencies in the 118 to 137 MHz band as described in the email below.

Regards,

Lorena Carvajal

Subject: BAE Systems - FAA Coordination Request - 118-137 MHz - Pending Renewal - File No. 0311-EX-RR-2017 (Merr Field Test)

Ms. Carvajal:

Good afternoon.

This email requests FAA coordination for the frequencies between 118-137 MHz, for the pending renewal application for experimental station WF2XUB under File No. 0311-EX-CR-2017.

As you can see below, for the 118-137 MHz range, the FCC has requested FAA coordination for the frequencies "121.72500000 MHz 126.20000000 MHz 134.10000000 MHz 135.07500000 MHz and 136.50000000 MHz";

For the prior renewal of Station WF2XUB, in your email below from 8/3/2015, you confirmed FAA coordination for these frequencies as follows:

- 121.725 (NG T130426)
 - 126.2 (NG T130426)
 - 134.1 (NG T130426)
 - 135.075 (NG T130426)

(NOTE: You also previously confirmed that the frequency 136.5 MHz was not subject to FAA coordination)

Accordingly, if you could please confirm FAA coordination (and the NG numbers) for the same frequencies for the pending renewal application under File No. 0311-EX-CR-2017, it would be greatly appreciated.

For your reference, the current version of the WF2XUB license is attached.

Best regards,

Jeff Rummel
Attorney for BAE Systems
