Subject: FCC File# 0593-EX-PL-2013

Message:

File No. 0593-EX-PL-2013
Ref. No. 22212

Ms. Nguyen:

In further reply to your request for FAA coordination dated 12/4/13 (Ref. No. 22212), this is to advise you of the following:

BAE Systems is still waiting for FAA to complete coordination. BAE Systems has agreed to replace the frequency 1018 MHz with the frequency 1010 MHz. The FAA previously completed coordination for the frequency 1356 MHz under NG T140021, but the FAA processor stated he required additional time to complete coordination for the remaining frequency. On several occasions, BAE Systems requested additional time to allow FAA to complete coordination of the remaining frequency.

FAA coordination has still not been finalized, through no fault of BAE Systems.

Accordingly, it will be necessary to obtain additional time to complete FAA coordination of the remaining frequency. To that end, BAE Systems requests that it be provided until July 30, 2014 to allow FAA to complete this coordination. If additional time is required beyond that date, the applicant will contact you. As soon as coordination is completed, BAE Systems will advise you. Please advise if you have any questions regarding this matter.

Respectfully submitted,

Jeff Rummel
Attorney for BAE Systems
