Mr. Serafini:

BAE Systems appreciates your comments regarding the scope of the frequency request under File No. 0662-EX-ST-2005. BAE Systems is committed to ensuring that the need for its frequency requests are clearly connected to the requirements of its customers. To that end, and in response to your comments in your transmittal dated December 1, 2005, BAE Systems has specifically addressed the frequency request for this application with the relevant personnel in both the FAA and Army, and the company is confident that such personnel understand the program requirements associated with operation on the GPS frequencies in the 1100-1700 MHz band. Once the application is released by the Commission for processing, BAE Systems intends to continue its coordination efforts with NTIA, FAA and Army, to ensure that there are no additional questions regarding the requirements associated with this frequency request.

BAE Systems trusts that this reply satisfactorily responds to your inquiry and that the application may now be released for processing by NTIA and Army. Thank you for your comments, and please do not hesitate to contact undersigned counsel with any further questions.

Best regards,

Jeffrey Rummel
Attorney for BAE Systems
