

Explanation of Amendment

In response to the comment of the Commission staff with respect to concerns of NTIA within 322-328.6 MHz, the application has been amended to:

- Delete the frequency 326 MHz
- and
- Add as suggested alternates the frequencies 316 MHz or 321 MHz. BAE Systems can accept either of these frequencies as a replacement for 326 MHz, whichever is preferred by NTIA and the Commission.
