Subject: File Num#1250-EX-ST-2019 reminder on MAG pre-coordination data request

---

Message:

File No. 1250-EX-ST-2019

Ref. 49483, 49966

Ms. Nguyen:

In reply to the inquiries issued under Ref. 49483 and 49966, and as previously provided to the Commission in the emails below, this is to confirm the following information which was provided at Exhibit 1 to the application:

BAE Systems developed and produces SIGINT systems used by US Government military customers. This experiment will involve calibration and testing to enhance the performance, capabilities and accuracy of the subject SIGINT system. This technology will be incorporated into active military weapons systems, which in turn will directly improve the success and utility of the military missions flown by the SIGINT system in the areas of deployment. This request is in direct support of US Army and their contract with BAE Systems, as follows:

Customer: US Army  
Contract No. : W56KGY-16-D-0013-0002  
Customer Contract POC: Robert WinKopp (443) 861-2304 Robert.C.Winkopp.civ.@mail.mil

It is BAE Systems's understanding that direct contact and coordination with MAG is not required, and that MAG coordination is being conducted as part of standard processing through NTIA.

However, if the Commission requires additional contact and coordination directly with MAG by BAE Systems, please advise. Otherwise, BAE Systems assumes that these inquiries have been sufficiently addressed to the Commission's satisfaction.

Best regards,

Jeff Rummel  
Attorney for BAE Systems
