Request for Info - STA File # 0101-EX-ST-2003

Message:

You suggested I select my VHF test frequencies from the frequencies allocated to the federal government. I believe this restricts my choices to: 30.000 - 30.560 MHz, 32.000 - 33.000 MHz, 34.000 - 35.000 MHz, 36.000 - 37.000 MHz, 38.000 - 39.000 MHz, and 40.000 - 42.000 MHz. Am I further restricted to those frequencies designated in the frequency band plan as allocated to the US Government, or can I also use frequencies allocated to the US military services or to US Government bureaus, e.g., Department of Agriculture?
