Supplemental Antenna Information

Form 442 File Number: 0139-EX-PL-2016
Company name: BAE SYSTEMS
Date: 20160223

The mobile test stand it is outfitted with a Microwave Visions Group QR2000 closed wideband quad Ridge horn antenna. This antenna has a narrow beam with and covers the frequency range of interest required by the test set. The technical details for the antenna are attached to this document.

The mobile test set with the antenna attached will be positioned approximately 20 feet in front of the nose of the test aircraft. Depending upon the orientation of the aircraft the test set exact datum and orientation will not be known until such time as the test facility and aircraft are presented for analysis.

Respectfully,

Alfred Raccio
Sr Prin II Systems Engineer
