

Narrative Statement

The purpose of this experimental is to provide Satellite uplink service for system integration and customer acceptance testing.

Operation will occur in the 14 to 14.5GHz frequency range. A STA experimental was recently granted for this same service under FCC call sign WH9XAT. We are requesting a “permanent” experimental for the same service as we anticipate further need for testing and demonstrations.

If you have any questions or require additional information, please feel free to contact us.

Sincerely,

Leo Bloschock
