Subject: Purpose of license modification

7 November 2011

The requested change is to the authorized bandwidth of the existing license. The license as it now stands is for a 2MHz allocation, which accommodated our original data requirements. We are requesting an increase to 4MHz. Due to recent events we now have requirements for twice the bandwidth that will carry the critical controls and engineering data for space vehicle research that Blue Origin is conducting. This research is essential to the continued operation of Blue Origin. Thank you in advance for your help.

Thank you
