"The One to Call On"™

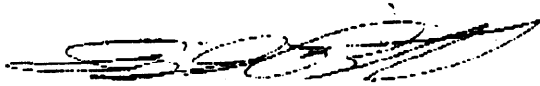

June 24, 1994

Mr. H. Franklin Wright
Frequency Liaison Branch Chief
Federal Communications Commission
2025 M Street
Washington, DC 20554

Dear Mr. Wright:

Southwestern Bell Mobile Systems, on behalf of Dallas SMSA Limited Partnership, the cellular licensee in Market 9B, supports the Microcell Product Development Testing ongoing at BNR/Northern Telecom in Richardson, Texas. This testing, utilizing prior coordinated "B band" cellular spectrum on a non-interfering basis, has allowed product development with no known degradation to cellular users.

Sincerely,

Jerry A. LaBerteaux
System Design Manager

RE: Use of Cellular Spectrum

Dear Ms. Yaeger:

Please consider this letter as temporary authorization for the continued use of the eight "B" band cellular channels for an additional 60 days from the date of this letter. This is a continuance of the authorization issued on May 24, 1994 for 60 days, subsequently extended on July 20, 1994 for 60 days. We are preparing the necessary modifications to our current agreement for extended use of channels. As stated in our letter of March 1, 1994, the channels currently authorized for use include the following: 647, 649, 651, 653, 655, 657, 661, 663. Of these channels only 657, 661 and 663 can be utilized for non-indoor testing during this extension period.

In addition, we will be reviewing our channel requirements/availabilities to meet both of our needs. If you have any additional questions concerning this extension, please feel free to call me at (214) 364-2667.

Sincerely,

**Jerry A. LaBerteaux
System Design Manager**
