This is in response to the partial grant of 0290-EX-PL-2004, WD2XNV and the USAF table NG 057983 for the 225-400 segment. The outcome after several months from AFFMA to Mr. Asongwed (FCC) was to direct me to Mr. Pawlowitz (FAA). I have sent him an email this afternoon. Meanwhile, I am pondering what will happen to the balance of the application for the 400-1232Hz. The FAA removed their tables and NG057981 as noted in FCC correspondence July 20, 2006 from OET. However, the license was not reissued with this band segment while we continue to wait for 225-400 MHz.

Thank you,

Chuck Zappala
