The FAA concurs with the use of 1530 MHz, but non-concurs with 1559 MHz. The latter is on the GPS band, and the specifications are not within the limits imposed by NTIA.

Request for FAA Pre-coordination

Gentlemen,

Boeing is requesting FAA pre-coordination for the use of 1530 and 1559 MHz at Boeing Satellite Systems facilities located at El Segundo, CA. The purpose is to test satellite components during the manufacturing process of a GPS satellite for the next 6 months.

Please find enclosed the documents that describe how the tests are planned. The Technical Description 2 document contains the public information. The Confidentiality Statement is required by the FCC to withhold from the public the confidential information noted in the Confidential Items document.

If you have any questions please let me know

Mr. Murphy,

Boeing is again submitting a proposal to obtain pre-approval for the second frequency. Please see the attached. We have moved the second frequency from 1559 MHz to 1545 MHz.

Please find enclosed the documents that describe how the tests are planned. The Technical Description 3 document contains the public information. The Confidentiality Statement is required by the FCC to withhold from the public the confidential information noted in the Confidential Items document.

If you have any questions please let me know.
