

Exhibit 1 for FCC License FAA Antenna Sketch

1. The tallest of the installed communications antennas are 25 Ft. non directional whip antennas which will be installed on the 03 level of the 123' cutters. The cutter's main Radar mast exceeds the height of the communications whip antennas by approximately 5 feet.
2. Since these antennas are shipboard mounted and the nearest airport is 65 KM. Distant very little danger to aircraft exists.
