

Exhibit 2 for FCC License Application, Government Project Description

1. Forty Nine (49) United States Coast Guard Cutters (110' WPB) are being converted to (123' WPB) cutters at the shipyard, and a new communications suite is part of this conversion. Equipment level and full integrated level testing is required by the Government to demonstrate that the new and refurbished communications equipment provided to the U.S. Coast Guard complies with contract requirements.
2. Individual tests of each transmitter will be of very short duration, merely long enough to obtain a radio check and verify equipment operation.
