Question 4
U.S. Government Contract Information

Contract Number – SPO700-98-D-4002
Defense Information Systems Agency
5275 Leesburg Pike
Falls Church, VA 22041
Contracting Officer – Bruce Bennett
703-882-0072

Information related to this contract is for official use only.

This application is in support of the Tactical Service Provider (TSP) Joint Capabilities Technology Demonstration (JCTD) effort. TSP is a three year demonstration effort sponsored by the Office of the Secretary of Defense. The TSP effort has the overlying objective of evaluating the effectiveness and warfighter utility of delivering broadband services through a hybrid two-way communications architecture, using standards based satellite communications (SATCOM) and WiMAX (802.16e) technologies. Recent military conflicts such as Operation Iraqi Freedom (OIF) and Operation Enduring Freedom (OEF) have validated the significance and operational need of delivering real-time broadband services, such as Unmanned Aerial Vehicle (UAV) video dissemination, to in-theater forces. The wireless extension of the SATCOM connectivity to the simulated tactical edge via the WiMAX (802.16e) link is a requirement of the TSP demonstration and the ability to transmit at three locations described in this application is needed to meet this requirement.
