

**Justification for Expedited Processing of STA Application
Television Production at Pasadena Rehabilitation Center
at Pasadena, CA**

As is well known there are continuing concerns related to terrorist attacks as well as random acts of violence by individuals or groups and the need to provide security at high profile activities such as this event. This media production will include a number of celebrities and therefore is the type of event that could be targeted by terrorist or any group or individual looking to inflict violence or at the very least cause a major disruption.

In view of those concerns, law enforcement officials need all the assistance that can be provided to aid them in identifying potential threats. Therefore, the video feeds from the portable cameras covered in this STA request will be available to security personnel to help in on the scene identification of potential security problems. In view of that expedited processing of this application is hereby requested.

AFTRCC Coordination has delayed the filing of this application. The coordination is still pending and a copy of the request is attached as instructed by James Burtle.
