Message:

The STA application is not requesting a radius that would cover all the area that encompasses the all points. What we are attempting to request is for a 10 mile radius of points along the race course as noted in the AFTRCC coordination. Unfortunately the application form does not lend itself to such a request so we supplied the center point and attempted to explain what we really needed in the attachment. If we specified a radius large enough to cover all the point then we would be requesting areas not covered by the AFTRCC coordination. Thanks for you assistance and please advise us how to proceed.
