

Explanation of Request for Use of Additional Spectrum

Subsequent to filing the initial STA request, the demand for spectrum use at this event has grown necessitating a request for additional spectrum. The additional spectrum requested is for the microwave bands listed below. The maximum power will not exceed 100 mW, the operating bandwidth will not extend beyond the edge of the requested bands and usage will be restricted to inside the venues that will be under the control of a site frequency coordinator; therefore, no interference is anticipated to other users.

Frequency bands requested:

1350 – 1390 MHz

2155 – 2180 MHz

3550 – 3700 MHz
