This e-mail is your AFTRCC coordination.

The coordination includes this header information, DOD Area Frequency Coordinator comments, and AFTRCC comments. These messages must not be separated.

This recommendation is advisory only and not binding on the FCC. Applicants are advised that this coordination does not constitute a judgment that a recommended frequency is best suited to the applicant's purpose nor that the frequency is exclusive to the applicant. Flight Test frequencies are shared and may be subject to scheduling with other agencies.

In return for AFTRCC's processing of the applicant's coordination request, the applicant agrees to release and hold harmless AFTRCC, its officers, directors, members, agents and representatives from any claims, losses or expenses which may arise as a result of the applicant's use of these frequencies.

This coordination is not an authorization to operate. The FCC must grant the applicant authorization to transmit. A copy of this coordination must accompany your application to the FCC.

DAFTRCC members were polled and, with the exception of Raytheon who has not responded, we concur with this coordination.

Lockheed Martin would like to note that flight test operations on the F35 will likely occur during the requested period. The F35 uses several L-band frequencies at 10 Watts which overlap those listed below. The applicant should be aware of the possibility of interference from these operations. Operating

frequency, bandwidth, expected location, and date can be provided on request, with the understanding that last minute schedule and operating area changes are common.
