

Frequency Coordination Exhibit

This STA request proposes the use of frequencies assigned to the Amateur Service, the Wireless Communications Service and the Mobile Satellite Service. Coordination with licensees within a 75-mile radius will be conducted prior to initiation of operation. Should any objection be noted to the use of any of the proposed frequencies from any licensed service, that frequency segment or segments will not be used.

In the case of the Amateur Service, the applicant will contact both ARRL, the National Association of Amateur Radio Operators, and the local volunteer frequency coordination group, which is the Mid-America Coordination Council.

All WCS licensees in the Indianapolis area with assignments in the proposed segment will be contacted directly, as will any MSS licensees with earth stations proximate to the Indianapolis Motor Speedway.
