

Frequency Coordination Exhibit
Broadcast Sports, Inc.
STA for Indianapolis Motor Speedway
May/August, 2005
0256-EX-ST-2005

The applicant has commissioned a study of television broadcast channel occupancy in the frequency range 470-512 MHz within 100 miles of Indianapolis, Indiana. The frequency band requested, 476-477 MHz, falls within television channel 15. The nearest television channel 15 stations are WREP-LP in Martinsville; WANE-TV in Fort Wayne; and WNDU-TV in South Bend, Indiana. None of these stations provide any service near or to the Indianapolis Motor Speedway, and therefore interference free operation is expected.

Nevertheless, the applicant will coordinate its operations in the requested band with the local SBE frequency coordinator for the Indianapolis Motor Speedway, which it does in any case routinely. If any interference is caused by the proposed operation, the applicant will immediately cease using the frequencies without any necessary intervention by the Commission.
