The Explanation for STA

Applicant is a video production company which provides video for broadcast, satellite broadcast and cablecast of sporting and other events. Applicant has certain LTTS, BAS and private wireless licenses for this purpose. However, the spectrum usage in many major cities and the limited available spectrum for these events makes it necessary to make coordinated, temporary use of additional channels in 3.6 GHz band. This is necessary to have sufficient video relay from RF cameras at numerous locations at the events.

The Purpose for this STA

The purpose of this STA operation is to provide support and logistics for video relay for the annual running of the Indianapolis 500 Auto race in Indianapolis Motor Speedway in Indianapolis, Indiana.
