Re: Application for Experimental License;
Broadcast Sports Technology

Dear Mr. Wright:

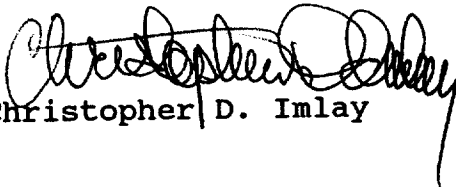

On behalf of our client, Broadcast Sports Technology, please find an original and two copies of FCC Forms 155 and 442, together with exhibits, constituting an application for a new Experimental Radio Service authorization. The application proposes to conduct experiments of new mobile video transmitters used for video and film production. The applicant is a manufacturer and provider of video transmission equipment for remote video production. It proposes to use frequencies allocated domestically for fixed and mobile operation.

The experimental operation will be aimed at developing new smaller, more compact video camera/transmitter units, which utilize video compression techniques to increase the number of camera/transmitters that can be located in automobiles in races for video production purposes.

The application is filed in Pittsburgh, together with the requisite filing fee in the amount of \$35.00 by check of this office payable to the Commission.

Should any question arise concerning this application, kindly notify the undersigned counsel.

Yours very truly,

Christopher D. Imlay
